

TECHNO FLEX® PO⁵

LINE CONFIGURATION

- 20-component gravimetric dosing system with automatic cleaning
- 1 extruder Ø 85 mm and 4 extruders Ø 65 mm
- 5-layer co-extrusion die head with installed die Ø 300 mm and IBC system
- High efficiency double flow cooling ring
- Automatic film thickness control
- Flattening and gusseting devices
- Calibration cages
- Oscillating haul-off 1800mm roller width
- Extruder regranulator system Trim Flex®
- Two-station face-to-face winder, contact/axial winding modes with automatic reel extraction
- Complete tower frame
- HMI Line control – ANY MA®

TECHNICAL DATA

APPLICATIONS

Shrink film for bottles and cans packaging, lamination film, printing film, general packaging film and stretch hood

MATERIALS

LDPE, EVA, LLDPE, MLLDPE AND BLENDS WITH MDPE, HDPE, COPP

THICKNESS RANGE > from 20 up to 200 µm

OUTPUT > 450 kg/h
